

PRINTER TEST SHEET

How to use: Export this svg to a pdf, and print the pdf on your colour printer. Then compare the results to the same colours on your monitor in the original svg. This will give you essential information on your printer's colour range, colour bleed, and colour accuracy. It will also allow you to colour calibrate your monitor, adjusting the colours and contrast to match the results of the print.

12pt

This text is intended to show body type at a particular point size. This is used to gauge colour bleed and readability at a variety of point sizes.

10pt

This text is intended to show body type at a particular point size. This is used to gauge colour bleed and readability at a variety of point sizes.
